SUPPLEMENTARY TABLES

Table S2. Bait constructs information

Table S2. DNA constructs used in the study.xlsx

Table S3. Complete list of PPIs detected and scored

Table S3. Complete list of PPIs detected and scored.xlsx

Table S4. Filtered high-confidence PPIs

Table S4. Filtered high-confidence PPIs.xlsx

Table S5. Protein abundance comparison between cell lines

Table S5. Protein abundance comparison between cell lines.xlsx

Table S6. Differential interaction scoring of PPIs

Table S6. Differential interaction scoring of PPIs.xlsx

Table S7. In cell western analysis results

Table S7. In cell western analysis results.xlsx

Table S8. Prey abundance changes by mutations

Table S8. Prey abundance changes by mutations.xlsx

Table S9. Ub-sites affected by USP28 knockout in MDA-MB-231

Table S9. Ub-sites affected by USP28 knockout in MDA231.xlsx

Table S10. Ph-sites affected by Spinophilin knockout in MDA-MB-231

Table S10. Ph-sites affected by Spinophilin knockout in MDA231.xlsx

Table S11. Breast Cancer public Gold Standard PPIs

Table S11. Breast Cancer public Gold Standard PPIs.xlsx

Table S12. MS data acquisition parameters

Table S12. MS acquisition parameters_BC.xlsx
